Application for 3/4" Water Service – Existing Tap

Customer wishes to purchase water from the Hart County Water and Sewer Authority (HCWSA) for:

Customer Name _____

Service location _____

Mailing address (address, city, state, zip) _____

Home phone _____ Work phone _____

Cell phone _____ E-mail address _____

Bank Draft: Yes _____ No _____ E-mail Bill: Yes _____ No _____

Meter Size 3/4" Account set up fee: \$25.00 Deposit: \$75.00 Total Due: \$100.00

To be completed by office: Paid via _____ Date _____

Received By _____ Receipt # _____

1. Customer understands he/she must have property adjoining the road right of way containing HCWSA's water line.
2. Customer hereby grants HCWSA access to Customer's property for the purposes of installing and/or maintaining HCWSA's equipment and materials that may be located on Customer's property.
3. Customer shall pay for water at rates determined by HCWSA and abide by HCWSA's current rules and regulations. Customer further understands that HCWSA may amend such rates, rules and regulations from time to time and Customer agrees to abide by such changes upon notice from HCWSA.

(continued)

4. Meters will be read monthly and a bill sent to the mailing or e-mail address above within approximately five days of the meter reading. Payment must be received at HCWSA's offices no later than the 20th of that month to avoid a late fee. Failure to receive a bill does not entitle delayed or non-payment. Customer understands that his/her water service may be turned off if payment is not received by the 10th day of the following month. If service is turned off the account balance plus a \$40.00 re-connect fee must be paid in full before service is restored.

5. Customer shall maintain a service line from HCWSA's meter to Customer's premises. Customer further agrees to verify the existence of a shutoff valve and pressure reducing valve in his/her line since the pressure in HCWSA's line may exceed the pressure capability of Customer's plumbing system. Customer also understands that HCWSA is not responsible for leaks or water losses on Customer's side of meter.

6. Customer understands that, while HCWSA will use reasonable diligence in furnishing Customer with dependable water service, HCWSA cannot guarantee a continuous and uninterrupted supply of water.

7. Customer agrees that no other present or future source of water, such as a private well, will be connected to any of the water lines served by HCWSA.

8. Customer agrees to verify the existence of a thermal expansion tank or pressure relief valve, since the HCWSA-furnished backflow preventer creates a closed water system. Closed systems where the temperature may increase, due to a water heater for example, are subject to thermal expansion and an increase in pressure which can damage plumbing unless the pressure is relieved. A water heater temperature and pressure (T&P) relief valve is not designed to function as a thermal expansion device.

Please feel free to contact HCWSA at 706-377-4387 or via e-mail at hcwsua@comcast.net if you have any questions.
